G-DECK is proud to hold industry-leading accreditations that reflect our unwavering commitment to quality, safety, and innovation. Our manufacturing facilities are certified to the **global ISO 3834-2 standard**, ensuring welding and production processes excellence.

Quick Features

- Erect up to 5.1 meters in height
- Multiple lifts with ease
- Fast to erect/dismantle
- Safest industry record
- 600kg per m2 loading
- Environmentally friendly
- Integral handrail and stair options
- Multi-level platform heights
- Internal access points
- Platform/Trestle/Tower
- Fully repairable

G-DECKTM STANDARD

G-DECKTM STANDARD

The globally patented G-DECK STANDARD System sets the benchmark for versatility, seamlessly adapting as a trestle, platform, or tower. Its innovative 3-in-1 design allows effortless configuration changes, eliminating the need for multiple systems. This unrivalled flexibility guarantees maximum efficiency and convenience on every job site.

Safety is at the core of the G-DECK STANDARD System. Engineered with high-strength materials, it delivers an impressive 6kN load-bearing capacity, creating a stable and secure platform for your workforce. Fully compliant with industry safety standards, the system provides complete peace of mind for everyone involved.

At G-DECK, we understand the importance of balancing cost control with safety and quality. The STANDARD System combines premium construction with affordability, offering exceptional value for money. Designed for longevity, it minimises maintenance and replacement expenses, making it a smart investment for your business.

The G-DECK STANDARD System integrates cutting-edge safety features, including guardrails, toe boards, and stairs, to reduce accident risks and enhance worker protection. Prioritise the well-being of your team with a system designed to deliver the highest levels of safety on-site.

Designed to excel in demanding work environments, the G-DECK STANDARD System offers unparalleled reliability and durability. Its robust construction ensures years of outstanding performance, enabling you to tackle any project with confidence.

G-DECKTM
LITE

G-DECK™

LITE

Discover the G-DECK LITE System, purposefully designed with a lightweight profile for effortless handling and transportation. Its reduced weight makes it the perfect solution for projects where mobility and flexibility are key, allowing you to move and adapt with ease.

Despite its lightweight design, the G-DECK LITE System offers a robust construction with an impressive 2kN load-bearing capacity. This innovative system provides a stable, secure platform, enabling your team to work efficiently and with confidence.

At G-DECK, we know the importance of stretching your budget without compromising on safety or quality. The G-DECK LITE System delivers outstanding value for money, combining affordability with reliable performance to meet the demands of your projects.

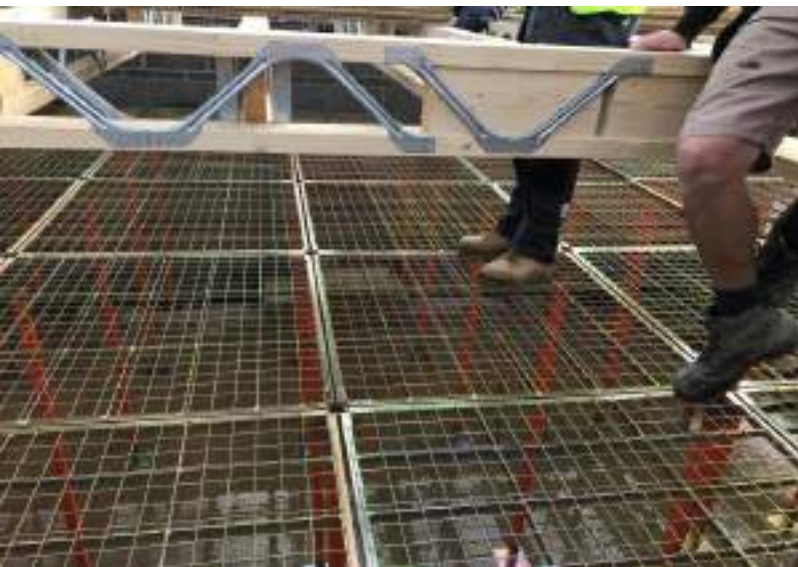

Time is precious, and the G-DECK LITE System is engineered with efficiency in mind. Its intuitive design ensures quick and straightforward assembly and disassembly, enabling you to set up and break down in record time. User-friendly components streamline your workflow, saving valuable time while maintaining safety.

Built for light work environments, the G-DECK LITE System is designed for long-term reliability. Its high-quality materials ensure exceptional durability, reducing maintenance and replacement costs over time. Invest in a system that stands the test of time and delivers consistent results for your business.

When it comes to lightweight solutions that don't compromise on strength or reliability, the G-DECK LITE Safety Decking System is the ultimate choice. Enhance your operations with a system that delivers safety, efficiency, and affordability in one powerful package.

G-DECK™
DUAL

G-DECK™ DUAL

The G-DECK DUAL System, seamlessly integrates scaffolding components to combine the best of both worlds. By utilising tubes and fittings or system scaffolding standards alongside our innovative decking modules, you can create custom work platforms tailored to your specific needs. Say goodbye to compromises and embrace a solution that works for you.

Engineered to deliver exceptional stability and a 6kN load-bearing capacity, the G-DECK DUAL System offers a robust and secure platform, allowing your team to work with confidence at any height. Rely on the strength and reliability of our system to enhance your operations and ensure success.

From complex construction sites to unique industrial challenges, the G-DECK DUAL System adjusts effortlessly to your environment. Its modular design allows quick and easy adaptation to irregular or demanding spaces, delivering unrivalled versatility for a wide range of scenarios.

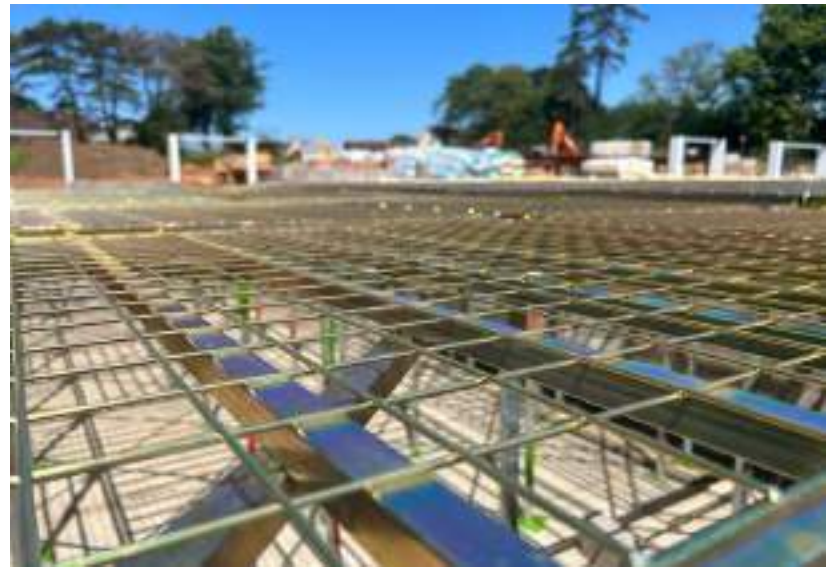

Efficiency is at the heart of the G-DECK DUAL System. Designed for user-friendly assembly and disassembly, it integrates seamlessly with tubes, fittings, or system scaffold standards. This straightforward installation process saves valuable time and effort, boosting productivity and minimising downtime on site.

Safety is paramount. The G-DECK DUAL System incorporates advanced safety features, including multiple lifts and scaffold guardrails, creating a secure working environment for your team. Fully compliant with industry safety standards, it protects your workforce while enduring the toughest working conditions.

Crafted from high-quality materials, the G-DECK DUAL System is built to last. Its durable construction ensures reduced maintenance and replacement costs, providing a reliable solution that stands up to the challenges of any project.

Quick Features

- Simple to install
- Combi lock (no more keys)
- Self-closing hatches
- 2-point ladder tie hatch
- Letterbox hatch
- No material wastage
- Can be colour branded
- Chequer plate anti-slip cover

G-DECK™ ACCESS HATCH

G-DECK™ ACCESS HATCH

The G-DECK Access Hatch is purpose-built to create an effortless access point between floors for people, materials, and equipment. Its intelligent design ensures seamless entry and exit, reducing disruptions and enhancing productivity. Discover how the G-DECK Access Hatch can transform your worksite by providing quick efficient access.

At G-DECK, safety is always our top priority. The Access Hatch incorporates advanced safety features, including combo locks, self-closing hatches, and letterbox equipment hatches, providing a secure environment at every access point. Designed to exceed industry safety standards, the Access Hatch offers unparalleled protection for your team, giving you peace of mind.

The Access Hatch is engineered to integrate seamlessly with the G-DECK Safety Decking System, ensuring a cohesive and efficient setup. It complements the decking modules perfectly, maintaining the same stability, durability, and impressive load-bearing capacity. With this fully integrated solution, your worksite operates as a unified, efficient system.

Efficiency begins with setup. The G-DECK Access Hatch features a user-friendly design for fast, hassle-free installation, saving precious time on-site. Its durable construction requires minimal maintenance, offering a long-term solution you can depend on.

Like all G-DECK products, the Access Hatch undergoes rigorous testing and quality control, ensuring it meets the highest standards of safety and reliability. With the G-DECK Access Hatch, your team gains confidence in accessing platforms securely and efficiently.

G-DECK LIFT SHAFT GATES

G-DECK™

LIFT SHAFT GATES

The G-DECK Lift Shaft Gate is expertly designed to provide smooth and efficient access to lift shaft voids. Its ergonomic, modular design allows for easy entry and exit while offering the flexibility to add extension wings to fit larger voids effortlessly. With the G-DECK Lift Shaft Gate, workers can move confidently around lift shaft voids, ensuring efficient operations and the timely completion of tasks.

Crafted from high-grade steel, the G-DECK Lift Shaft Gate is engineered to endure the toughest work environments. Its robust construction minimises maintenance requirements, reducing downtime and maximising efficiency, making it a reliable investment for demanding projects.

We understand that every project and lift shaft area has unique requirements. The G-DECK Lift Shaft Gate offers customisable options, including various sizes and additional safety features, ensuring it fits your specific needs perfectly. Whatever your project demands, G-DECK provides a solution that prioritises both functionality and safety.

At G-DECK, we are committed to meeting the highest safety and quality standards. The Lift Shaft Gate undergoes stringent testing and quality assurance processes, ensuring full compliance with industry regulations. With G-DECK, you can trust that your lift shaft access meets the highest safety guidelines and best practices.

Designed to integrate seamlessly into your existing setup, the G-DECK Lift Shaft Gate ensures secure and efficient operations around lift shaft areas. Its intuitive modular design streamlines your workflow while maintaining maximum safety for your workforce.

G-DECK™ STAIRWELL VOID HATCH

G-DECK™

STAIRWELL VOID HATCH

The G-DECK Stairwell Void Hatch is the ultimate solution for seamless access and egress in stairwell voids, enhancing workflow and productivity across a range of demanding environments. With its ergonomic design, it allows for easy navigation, minimising delays and disruptions. Workers can move confidently through stairwell openings, ensuring smooth operations and on-time task completion.

Every project and stairwell is unique, and we understand that. That's why the G-DECK Stairwell Hatch is fully modular and can be easily customised. Extension wings can be added to the sides and front to accommodate larger or irregular shapes, perfectly fitting your project's specific needs. Whether you require different sizes or additional safety features, we'll tailor the hatch to ensure optimal functionality and maximum safety.

Crafted with durability at its core, the G-DECK Stairwell Hatch is engineered to withstand the toughest work environments. Made from high-quality materials, it offers exceptional longevity and reduces maintenance needs, so you can focus on what matters most—getting the job done.

Our commitment to the highest standards ensures that every G-DECK Stairwell Hatch undergoes rigorous testing and quality assurance to meet industry regulations. With this hatch, you can rest assured that your stairwell access complies with all safety guidelines and best practices.

THRESHOLD RAMP

Our G-DECK Threshold Ramps combine durability, lightweight design, and functionality to provide a robust solution for smooth, safe passage over door thresholds. Featuring a non-slip surface mesh, these ramps ensure stable and secure movement for all users, whether manual or wheeled. Best of all, they are incredibly easy to install—no drilling or permanent modifications required, saving you time and effort.

Safety is a top priority at G-DECK, and we've taken it to the next level with our optional handrail system. Designed to be easily fitted in seconds, it offers enhanced fall protection, ensuring even greater safety for workers and users alike.

What truly sets our threshold ramp apart, however, is its versatility. Being fully adjustable giving options on height ranges from 200mm to 400mm, making it adaptable to a wide variety of door thresholds. Whether for residential or commercial applications, our ramp is the perfect solution for ensuring easy and safe access.

THRESHOLD RAMP – XL

Our G-DECK XL Threshold Ramps are specifically designed to meet the needs of wider walkways and larger spaces where standard ramps simply won't do. Combining versatility and safety, these ramps feature a fully adjustable design, allowing for a tailored fit to suit your unique requirements with ease.

Safety is paramount, and we've ensured that the XL Threshold Ramp delivers. A robust handrail provides enhanced user stability, while the chequer plate surface top minimises the risk of slips—even in wet conditions, ensuring a secure passage every time.

To add a professional, personalised touch, our XL Ramps can be finished in your brand's colours, offering both a practical and visually cohesive solution for any environment. Whether for residential, commercial, or industrial use, the G-DECK XL Threshold Ramp provides superior functionality and a sleek, branded appearance.

G-DECK™ STAIRCASE SURROUND

G-DECK™

SCAFFOLD STAIRCASE SURROUND

2024 saw us launch this innovation, our new UK-registered design Temporary Scaffold Staircase Security Surrounds. This groundbreaking product revolutionises the way temporary scaffold staircases are secured, offering enhanced safety, efficiency, and ease of use, all without the need for cumbersome scaffold clamps, clips, or additional tie support.

Temporary scaffold staircases play a vital role in construction projects, providing safe and convenient access to various levels. However, the challenge has always been finding the right security solution that fits the variety of scaffold systems such as Layher, Haki, Plettac, and tube & fitting. Traditional methods have often been time-consuming and unsuitable. That's where we come in to transform the process.

Our innovative surround is designed to fit all systems, providing a seamless solution for securing temporary staircases. It features an integrated Tower Security Gate, which serves as a robust access control system, ensuring that only authorised personnel can enter, significantly improving on-site safety.

As the manufacturers of our products, we offer a bespoke service tailored to your specific needs. We can powder-coat the surrounds in your company's colours and add logo plates, offering an opportunity for personalisation and a professional touch on construction sites.

With the G-DECK Temporary Scaffold Staircase Surround, you get the perfect combination of safety, security, and efficiency, all while showcasing your brand. Trust G-DECK to provide a reliable, cutting-edge solution for your scaffold staircase security needs.

G-DECKTM
G-RACK

G-DECK™ G-RACK

G-DECK's latest innovation, our Heavy-Duty Racking, sets a new benchmark for durable, versatile storage solutions. Expertly engineered to excel in the toughest industrial environments, our heavy-duty shelving and steel racking systems are constructed from high-quality materials designed to endure the test of time. Each unit is fully adjustable, allowing you to configure the racking to suit your specific needs with ease.

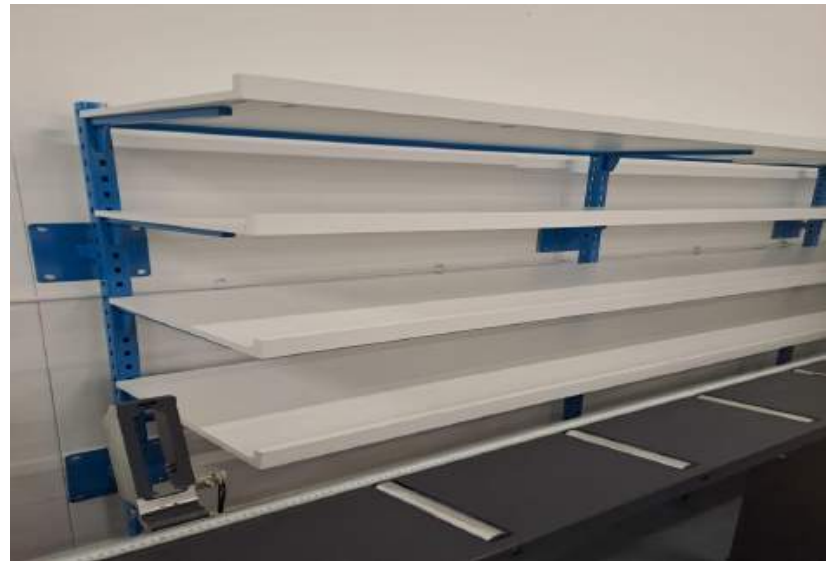

Designed for businesses that demand robust and reliable storage, our heavy-duty metal shelving and racking systems offer exceptional strength and adaptability. Whether you're storing large, heavy, or bulky items, our racking systems ensure optimal organisation and efficient use of space.

Perfect for warehouses, workshops, retail, and garages, G-DECK's racking solutions provide a secure and organised way to store your inventory. Choose from fixed racking for static storage or adjustable systems to accommodate changing stock levels, all backed by our commitment to durability and performance in even the most demanding industrial settings.

Our racking systems are easy to assemble and expandable, allowing them to grow alongside your business. Built to handle the heaviest loads while offering flexibility, G-DECK's heavy-duty racking systems are the ideal choice for businesses looking to optimise storage efficiency without compromising on strength, reliability, or long-term performance.
